## Summary

As a motivated and enthusiastic computer science student in the final year of study, I am seeking an opportunity to contribute to an organization by implementing the concepts, knowledge, and methods I have learned. Currently, I am focused on starting my professional career as a junior software developer in the backend or frontend areas, with the goal of becoming a full-stack developer. As a fast learner, curious team player with excellent communication skills, and a team player who can adapt quickly to new environments, I am able to adapt quickly to various situations.

My portfolio includes several assignments and projects on both front-end development and back-end development, all of which I have successfully completed. You might also be interested in reviewing my LinkedIn profile and GitHub portfolio for examples of my work. Furthermore, I am confident that if given the chance, I will be an asset to your company.

## Employment History

### Junior Software developer - Lykvyd AB, Linköping

As part of my bachelor's thesis, I was collaborating with Lykvyd AB. One of my responsibilities includes developing a chat feature for the company.

- January 2022 – August 2022

### Server - Kipo Restaurant, Kerman

As a part of my duties, I took orders, answered customer questions, and helped with cleaning and customer service.

- May 2018 – August 2018

## Education

### Bachelor's degree in Software Technology, 180 hp, Linnaeus University, Växjö

- August 2019 – Present
